SELF-DESCRIPTION

I am an open-minded person willing to listen and evaluate ideas hence not limiting to my own viewpoint only on issues. Intellectually, I love to create value out of ideas. On the other hand, to go beyond my creativity at an optimum level I do initiate brainstorming activities for more inputs and ideas. A keen and reasonably fast learner who stay focus, teamwork is also my thing when it comes to working together. I can work independently as well. I am a humble person, willing to learn new things and to expand my pool of knowledge throughout the process. I tend to throw multiple questions to clarify situations to avoid misunderstanding.
